

Theatre Locale – The Heavitree Squilometre Update

Welcome to the June/July 2017 issue of *Theatre Locale*, the newsletter for [Interwoven Productions](#), featuring the [Heavitree Squilometre](#) update!

IN THIS MONTH'S ISSUE:-

- **Perseids in the Park! - Join Dr Claire Davies to see this year's Perseid meteor shower** - Saturday 12th August 2017
- **Why not join the Quarry Pod?** - next meeting Monday 14th August 2017.
- **Second Community Survey walk with Dr Jon Cinnamon** - For the Heavitree Quarry Trails project - Thursday 24th August 2017.
- **What we learned on the first walk** - Amazing findings by our community surveyors.

■ **Perseids in the Park! - Join Dr Claire Davies to see this year's Perseids!** - Saturday 12th August 2017

After the incredibly popular planetarium talk in the winter, as part of the Park in the Dark project, Dr Claire Davies from the University's Astrophysics Group has offered to come back to Heavitree Park during the height of the Perseid shower.

We'll be keeping a weather watch of course but fingers crossed for some great Perseid sightings!

As usual there is no charge to join this event but whatever donation you can offer on the night will go directly to the next *Squilometre* community event. Inside the Heavitree *Squilometre*, what goes around, comes right on around again. To manage numbers safely it is essential that you contact us by email or telephone (below) for your joining details please. (No website page sign-in this time.)

■ Why not join the Quarry Pod - next meeting Monday 14th August 2017.

The Heavitree Quarry Trails steering group, or “Quarry Pod”, met in June at the Royal Oak, Heavitree to discuss the results of the first survey and plan the next steps. Thanks to their problem-solving brainstorms we believe we've made the options for getting involved in the project even clearer.

Check them out here - [Heavitree Quarry Trails](#). The next Pod meeting will be on Monday 14th August - please do just drop us an email or give us a quick call if you fancy joining us. All are welcome.

And guess what the Royal Oak snug fire surround is made of?! We think it's Heavitree stone!

■ Second Community Survey walk with Dr Jon Cinnamon - For the Heavitree Quarry Trails project - Thursday 24th August 2017.

Come join Dr Jon Cinnamon, Lecturer in Human Geography at University of Exeter for the second Community Survey walk for the Heavitree Quarry Trails project. This will be held in the evening of Thursday 24th August 2017. Please sign up for your joining details, either by

email, telephone or via the [website](#).

■ What we learned on the first walk - Amazing findings by our community surveyors

We had a wonderful stroll through Heavitree on a sunny Sunday afternoon in June exploring our Mediaeval heritage through this red stone “skeleton” of building stone. From standing examples like the pretty St Clare's at Livery Dole (dating from 1400s) to a myriad of examples at the base of walls and tucked away in side alleys - each example a potential answer to what was there 600 years ago! Do check out this [page](#) with our findings so far and a wonderful old map from 1813 ...

.... and come join us for the next survey!

If you'd like to support this “circular” way of working; of the residents making a “pay-it-forward” donation so that the next Heavitree-focussed event can happen. If you enjoy celebrating this place, its history, culture, natural and built places but most of all its PEOPLE, then please do consider popping something in the [Commission Pot](#). Remember, what goes around a *Squillometre*, comes right on around again!

The Heavitree *Squillometre* belongs to you!
